

# KNOCK-OUT

*Clears Cloudy Pools FAST!*

Knock-Out is formulated to “knock out” particles and dead algae and drop them to the bottom of the pool, so they can be vacuumed away.

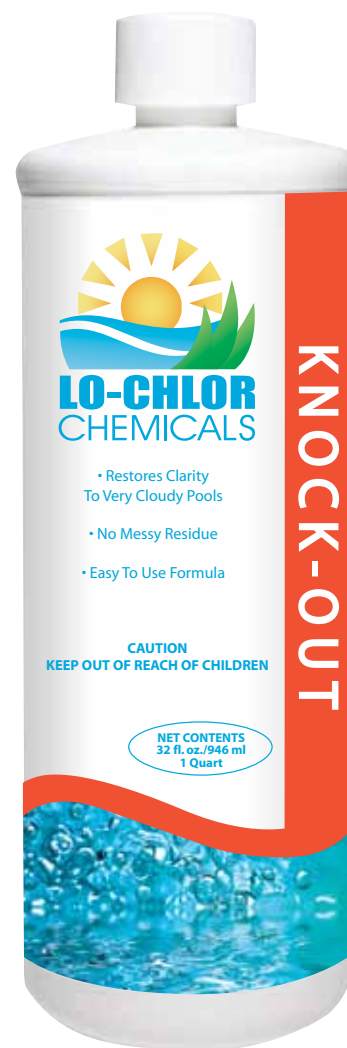

- **Leaves no messy residue**
- **Clears very cloudy pools in 12-24 hours**
- **Easy to use with a convenient squirt applicator**

There is nothing more inviting than a sparkling clear pool. When dust, pollen or other matter become suspended in the water, however, the pool takes on a cloudy appearance. The more matter; the cloudier it becomes. These particles are too small for even the best filtration systems and they simply pass through without being removed.

While clarifiers do a great job at encapsulating particles, making them easier for the filter to trap them; particles in very cloudy pools are too numerous to all be captured with a clarifier. This is when you need the Lo-Chlor flocculent product Knock-Out, to drop them to the bottom where they can be easily vacuumed away. A second treatment may be required for extremely heavy particulate concentration.

Once your pool water is cleared, be sure to use Lo-Chlor MiraClear Water Clarifier, liquid or gel, on a monthly basis to maintain the beauty and sparkling clarity of your pool.

Quart Easy Squirt Bottle treats 15,000 gallons of pool water.
